

PIENAAR ENERGY (PTY) LTD

Fonaford Off-Grid Solar Containerized Smart Type

Overview

A silent, worry-free alternative to loud and dirty diesel generators to meet high off-grid power needs using solar power generation – with optional wind turbine (s) for augmented power generation day and night. MOBIPOWER containers are purpose-built for projects where energy demands go beyond what a trailer can deliver. These rugged, self-contained systems integrate large solar arrays, advanced battery storage, and high-capacity fuel cells — with optional diesel redundancy when regulatory or client. A mobile solar container can provide clean, off-grid power to remote locations, construction camps, island resorts, and field operations. The systems are expanding in application where diesel delivery is not feasible, and grid access does not exist. How do mobile solar containers work efficiently. Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no shading from a remaining container structure. Comprising solar panels, batteries, inverters, and monitoring systems, these containers offer a self-sustaining power solution. Among the most scalable and innovative solutions are containerized solar battery storage units, which integrate power generation, storage, and management into a single, ready-to-deploy. MOBISMART IS THE LEADING PROVIDER OF ADVANCED, MOBILE, SOLAR OFF-GRID POWER GENERATION AND STORAGE SYSTEMS THAT CAN BE EASILY DEPLOYED TO CONSTRUCTION SITES IN URBAN, RURAL AND REMOTE LOCATIONS.
