

**PIENAAR ENERGY (PTY) LTD**

# **French solar Communication solar Base Station**

## Overview

---

Set to go live in 2025, the solar farm will cover a surface area of 50,000 sqm (538,200 sq ft) with an installed capacity of 5MW (1MW for self-consumption and 4MW for reinjection). The power station will supply 20 percent of the site's energy needs and surplus electricity can be fed. Summary: Discover how solar energy solutions are transforming communication infrastructure, reducing operational costs, and enabling connectivity in remote areas. This guide explores innovative solar applications for base stations, backed by real-world case studies and energy trend analysis. The power generated by solar energy is used by the DC load of the base station computer room, and the insufficient power is supplemented by energy storage. As global energy demands soar and businesses look for sustainable solutions, solar energy is making its way into unexpected places—like communication base stations. You know, the telecom industry's facing a perfect storm.
