

PIENAAR ENERGY (PTY) LTD

GM8 inverter power

Overview

Converts DC power from your V2H-capable GM EV *, GM Energy PowerBank and compatible solar panels into AC power, the type of current found in the grid and used in your home. Stores enough energy to jump-start your system in case of a power outage. The GM Energy PowerBank is limited to 450V. The proprietary, intelligent microchip inside every IQ8 Series Microinverter makes switching your home from on-grid to off-grid virtually seamless. 11 (GM Energy Inverter) converts energy from compatible photovoltaic systems, compatible energy storage systems and compatible electric vehicle to be used in the home (additional system equipment required). What is the best way for me to power my GM8?

Really just looking to use household current. What would you guys do?

Posted 16 January 2016 - 12:49 PM Beats me.
