

PIENAAR ENERGY (PTY) LTD

Global Microgrid Trillion Space

Overview

This report by the World Economic Forum, in knowledge partnership with McKinsey & Company, shines a light on the key developments that will shape space and its adjacent industries through to 2035. This article is a collaborative effort by Alizée Acket-Goemaere, Ryan Brukart, Jesse Klempner, Andrew Sierra, and Brooke Stokes, representing views from McKinsey's Aerospace & Defense Practice and the World Economic Forum. We estimate that the global space economy will be worth \$1. The findings, interpretations and conclusions expressed herein are a result of a collaborative process facilitated and endorsed by the World Economic Forum but whose results do not. Countries across Asia, Africa and Latin America are rapidly adopting solar microgrids to electrify remote regions that lack access to conventional grids, according to a microgrid market analysis. The market is expected to grow from USD 36.1 billion in 2023, at a CAGR of 18%. Increasing emphasis on energy reliability and resilience, combined with the global microgrid market, value at USD 40.1 billion in 2035. I need the full data tables, segment breakdown, and competitive landscape for detailed regional analysis and revenue estimates. Microgrids are a growing requirement of clean energy is promoting the adoption of smart grids initiatives. Future power grids must be flexible, accessible, reliable, and economically viable to achieve the goals of the smart grid.
