

## PIENAAR ENERGY (PTY) LTD

# Haiti air energy storage project

## Overview

---

A football-field-sized battery humming under the Caribbean sun, storing enough juice to light up Port-au-Prince's night markets and keep hospitals running during blackouts. This isn't a futuristic dream—it's Haiti's energy reality taking shape. The investment grant HA-G1048 ("the project") builds upon the program 4900/GR-HA and GRT/CF-17708-HA ("Improving Electricity Access in Haiti"). The expansion of Moss Landing Energy Storage Facility in California, already the world's biggest BESS. Haiti's energy sector is undergoing quiet transformation through energy storage projects already in operation. These initiatives combine solar power, battery storage, and microgrid solutions to tackle chronic electricity shortages affecting 65% of the population. With frequent power outages affecting 60% of urban areas and 90% of rural communities, reliable energy storage isn't just technical jargon—it's Haiti's ticket to. by other power sources like wind and solar. We briefly discussed this mostly underground tech a few. (Ssangyong E& C) declared its triumph in securing the final order for a solar power plant and Energy Storage System (ESS) construction and operation project in Haiti. The Haitian Ministry of Economy and Finance (MEF) commissioned this initiative. Source: [27] Compared to chemical batteries, micro-CAES systems have some interesting advantages.
