

PIENAAR ENERGY (PTY) LTD

High-efficiency mobile energy storage containers used on farms in Djibouti

Overview

These containers provide portable, weather-resistant, and scalable energy storage. They enable farms to harness renewable energy efficiently, reduce reliance on fossil fuels, and ensure uninterrupted power for critical operations like irrigation and refrigeration. Their modular design allows farmers to deploy them anywhere on the property, whether near solar panels in a sun-drenched field or beside a wind turbine on a remote. MOBIPOWER containers are purpose-built for projects where energy demands go beyond what a trailer can deliver. These rugged, self-contained systems integrate large solar arrays, advanced battery storage, and high-capacity fuel cells — with optional diesel redundancy when regulatory or client. These self-contained units integrate solar panels, batteries, and control systems into a single transportable structure, enabling reliable electricity production anywhere sunlight reaches. However, the inconsistent nature of these sources can.
