

**PIENAAR ENERGY (PTY) LTD**

# **Home photovoltaic panel evaluation report**

## Overview

---

Homeowners can utilize this tool to estimate the system size, cost, payback time, annual savings, potential CO2 reductions, and the benefits of incorporating a battery into the solar system. Standout Solar offers a FREE Assessment to evaluate the conditions of your home. Whether you're a. This has given homeowners easier access to cost-saving renewable resources than ever, and incredibly, 15% of American homes are projected to host solar panel installations by 2030. Compare loan, lease, and purchase options for your solar. Caution: Photovoltaic system performance predictions calculated by PVWatts ® include many inherent assumptions and uncertainties and do not reflect variations between PV technologies nor site-specific characteristics except as represented by PVWatts ® inputs. Evaluating your home will help you understand the.

## Solar Photovoltaic: SPECIFICATION, CHECKLIST AND GUIDE

About the Renewable Energy Ready Home Specifications Assumptions of the RERH Solar Photovoltaic Specification Builder and Specification Limitations

- 1.5 Document the solar resource potential at the designated array location
- 3.3 Install a conduit for the AC wire run from the designated inverter location to the electric service panel
- 4.2 Record the name and Web address of the electric utility service provider

5.1 Landscape Plan

5.2 Placement of non-array roof penetrations and structural building elements

Appendix A: RERH Labeling Guidance

These specifications were created with certain assumptions about the house and the proposed solar energy system. They are designed for builders constructing single family homes with pitched roofs, which offer adequate access to the attic after construction. It is assumed that aluminum framed photovoltaic (PV) panels mounted on a "post" and rail mount.
