Homemade small crane for photovoltaic panel hoisting

Overview

Tutorial on how to DIY a small crane to lift photovoltaic panels simultaneously and place them precisely where needed. This method requires an experienced operator. Some installers use specially designed conveyor systems that transport the panels to the rooftop. This method. Have you tried out dark mode?

! Scroll to the bottom of any page to find a sun or moon icon to turn dark mode on or off! I was able to lift and install all 7 385w panels on the roof by myself. I think the most critical thing to realize is that you should. Pete himself of HB Powerwall fame mentioned in his live stream today something about having issues lifting PV panels onto the roof, so I thought I'd share "my" (*1) method. 7m tall roof, all by myself! It should be obvious how it works, but still. We have done about ten solar hot water jobs that each had 30 plus collectors.
