# House solar photovoltaic panel weight

## Overview

---

What is the average photovoltaic solar panel weight I should expect?

Generally, standard residential photovoltaic panels weigh between 40 and 50 pounds (about 18 to 22 kilograms). This weight makes them manageable, but still requires careful lifting during installation. These panels cover an area of 17.62 square feet and weigh around 40 pounds, excluding the weight of frames and mounting equipment. On the other hand, commercial solar panels typically feature 72 cells, with dimensions of approximately 3. However, the exact dimensions depend heavily on the panel's technology, wattage, and the manufacturer's design. Solar cell count: 72-cell solar panels intended for commercial installations are. Roofs can only withstand so much weight, and it is crucial to know how much your solar panel of choice will weigh.
