## Overview

---

This hybrid inverter is grid-tied and battery-ready (works with Growatt's ARK battery), offering high efficiency at a steal. It's got dual MPPTs—fancy talk for handling two panel strings separately—great for split roofs. Well, let's break this down: Ketuda photovoltaic inverters currently range from \$1,200 to \$4,800+ depending on capacity and features. But why the sudden price drop compared to 2023 models?

The answer lies in three key factors: Wait, no – that's not the full picture. While others go dark during outages, this microinverter uses sunlight to reboot your system even if your battery's dead. 330W per Microinverter: Each panel gets its own brain, so shading one won't. What is a Solar Inverter?

The Ultimate 2025 Guide (All Questions Answered) From DC to AC, sizing to cost, and hybrids to microinverters—this is the complete, expert guide to understanding the most critical component of your solar setup.
