

**PIENAAR ENERGY (PTY) LTD**

**How many tons of water does  
solar power generation  
consume**

## Overview

---

Photovoltaic solar and wind energy generation consume next to no water. With water scarcity becoming a reality and water prices increasing, the importance of water conservation is key both for the environment and for economic purposes. Coal-fired power plants use up 1,100 gallons of water for each megawatt-hour of power produced. The water they do use serves primarily for cleaning dust from solar panels – a process that typically requires less water annually than a typical household. Water use requirements for solar power plants. In 2021, natural gas combined-cycle generation averaged a water-withdrawal intensity of 2,803 gal/MWh, compared with 19,185 gal/MWh for coal.

## How many tons of water does solar power generation consume

---

### Comparison of Water Use by Energy Generation Types

Photovoltaic solar and wind energy generation consume next to no water. With water scarcity becoming a reality and water prices increasing, the importance of water conservation is key

### Water Use Management - SEIA

In general, all solar power technologies use a modest amount of water (approximately 20 gallons per megawatt hour, or gal/MWh ) for cleaning solar collection and reflection surfaces like mirrors, ...

### Fact Check: How Much Water Does Solar Power Really Use?

Nuclear and natural-gas-fired power plants use water 800 and 300 gallons for the same amount of power, respectively. And solar, according to the Climate Reality Project, is the least water ...

## Does Solar Power Use A Lot Of Water

Unlike conventional electric power plants, which rely heavily on water for cooling, solar panels generate electricity without consuming water. This water-free operation not only fosters ...

[Get Price](#)

## How Much Water Do Solar Panels Use vs. Fossil Fuels?

So, how much water does it actually take to clean solar panels? For every megawatt-hour (MWh), it takes an estimated 20 gallons of water to keep them clean enough to maintain efficiency for the year.
