How much do solar panels cost farmers

Overview

Solar panels can cost between \$10,000 to \$30,000 for small to medium-sized farms. Federal incentives, like the USDA's REAP, can cover up to 25% of solar project costs. The Ag Economy Barometer found the majority of farmers are being offered more than \$1,000 per acre by companies for solar leasing, and economists say that could also drive up the price of cash rental rates. Escape will cancel and close the window. solar energy capacity of 115 TW. If your farm isn't a commercial farm (growing at your home for your own sustenance with less than \$1,000 per year in sales) then you'll need to take a look at. Initial installation costs for solar panels range from \$15,000 to \$30,000 for an average farm.
