How much does a solar container system cost in Cambodia per day

Overview

System Size: A 5kW residential setup averages \$4,500-\$6,000 USD. Import Taxes: 15% duty on batteries raises end-user costs. Solar Irradiation: Cambodia's 5.2 kWh/m²/day sunlight reduces storage needs by 18% compared to cloudy regions. Let's face it: Cambodia's solar panel price remains 20-30% higher than in neighboring Vietnam or Thailand. But why?

Well, three factors dominate: import dependence, fragmented supply chains, and limited financing options. Over 80% of photovoltaic systems here rely on Chinese or European imports. I checked last year for my home - was going to cost around 8,000 installed for a hybrid 8kW system. 03 per kW, significantly lower than that of coal, which is USD 7.
