

PIENAAR ENERGY (PTY) LTD

How to calculate the price of photovoltaic panels purchased by yourself

Overview

Divide annual kWh by ~1,200 (typical kWh/year per kW of solar in much of California). This gives your solar cost per square foot. Use our easy ROI Calculator to estimate your return. [Calculate ROI Here](#) The average American household pays a monthly electric bill of \$118. When you go solar, the power generated by your solar panels replaces the electricity you buy from the utility company, reducing or completely eliminating. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. System size: measured in kilowatts (kW), 3. Equipment quality: including. In this guide, we'll break down average solar costs per square foot in 2025, show how they compare by home size, explain why this metric has limits, and give you expert tips to reduce your price.

How to calculate the price of photovoltaic panels purchased by you

Solar ROI Calculator: Calculate Solar Payback Period

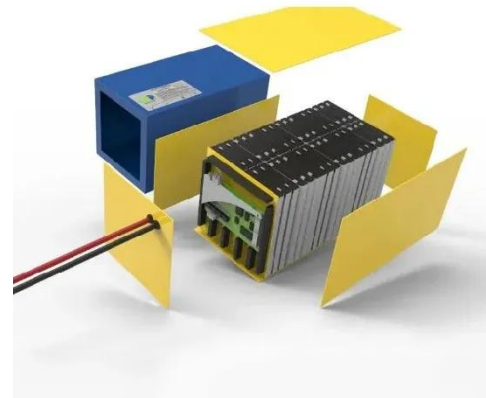

Solar panels are expensive up front, but a great investment in the long run. Don't take our word for it, use our solar ROI calculator and see for yourself.
