# **How to install the photovoltaic panel water collection tank**

## Overview

---

In this video, I walk you through how I built a simple off-grid solar-powered water pump system using an IBC tote, solar panel, 12V battery, and pump. This setup is perfect for homesteading, gardening, or anyone looking to collect and distribute rainwater without. This OFF GRID rainwater harvesting tank collects water from our garden pavilion roof. An off grid solar system will run. This guide walks homeowners through the essential components needed, step-by-step construction methods, optimal positioning for maximum efficiency, and maintenance tips to ensure long-lasting performance. A solar water pumping system consists of three major components: the solar array, pump controller and electric water pump (motor and pump) as shown in Figure 1. To build a DIY solar hot water storage tank, you'll need materials like a solar collector, an insulated storage tank, copper tubing, and a heat exchanger. The Solar Water Pump System can be used for residential water requirements and also for commercial uses. Industry data shows properly cooled panels can yield 8-12%.

 Efficient Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPPT Trackers, 150% DC Input Overvoltage
- Max. PV Input Current 15A, Compatible with High Power Modules

 Intelligent Simple O&M

- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD prevent lightning damage
- Battery Reverse Connection Protection

 Flexible Abundant Configuration

- Plug & Play, EPS Switching Under 30ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 Units Inverters Parallel
- AFC Function (Optional): when an arc fault is detected the inverter immediately stops operation

## Solar Thermal Plumbing Arrangements

There are two main choices for how to arrange the plumbing in the solar loop, drain-back and pressurised solar systems: When the pump is not running in a drain-back solar system, all of the ...
