How to make a square for photovoltaic panels

Overview

A detailed instructional video on how to square a solar PV array. To install solar panels in a square area, it is essential to follow a structured approach. Choose suitable solar panel types, 3. Decide on the installation angle, 4. The available area must be free from obstructions that could cast shadows. Then run a line between the two and fit your brackets to these lines - this will ensure that your rails are straight.
