

PIENAAR ENERGY (PTY) LTD

Huawei Intelligent Photovoltaic Tracking Bracket

**Efficient
Higher Revenue**

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPP Trackers, 150% DC Input Oversizing
- Max. PV Input Current 16A, Compatible with High Power Modules

**Intelligent
Simple O&M**

- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

**Flexible
Abundant Configuration**

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 units Inverters Parallel
- AFCI Function (Optional): when an arc-fault is detected the inverter immediately stops operation

Overview

This system combines flexible cushioning with rigid support and incorporates closed-loop feedback control technology to achieve precise tracking of sunlight, leading the way into a new era for photovoltaic tracking systems. With the highest L4 CGC certification, the cutting-edge Smart I-V Curve Diagnosis facilitates instant identification of faulty modules and reduced reliance on manual inspection, saving time and costs. Thanks to the AI algorithm, the smart tracker automatically adjusts the angle to optimize sunlight. The principle of photovoltaic intelligent tracker is to make the solar panel change with the change of the sun's angle, always keep facing the sun, so that the sunlight can directly shine on the power device of the solar panel. Photovoltaic brackets. Photovoltaic tracking bracket is a supporting device that adjusts the angle in real time to follow the sun's azimuth (east-west direction) and altitude angle (north-south direction) through mechanical and electronic control systems, providing an optimal light-receiving posture for solar panels.
