

PIENAAR ENERGY (PTY) LTD

Hybrid type of photovoltaic outdoor cabinet for power grid distribution stations

Overview

A power system in an outdoor hybrid power supply cabinet integrates multiple energy sources to ensure a continuous and reliable energy supply. If that single source fails, the entire site is at risk of downtime. In many traditional cabinets, solar controllers, battery management systems, and generator modules operate independently. One cabinet per site is sufficient thanks to ultra-high energy density and efficiency. Wall-mounted and pole-mounted installation is facilitated by compact design, making it simple to deploy at diverse locations. Integrated monitoring units and NB-IoT/5G communication enable remote. In the thriving era of distributed energy and microgrids, the photovoltaic-storage hybrid grid-connected/off-grid integrated cabinet has emerged as a “smart bridge” connecting photovoltaic systems, energy storage, and loads.

Lithium battery parameters

Product capacity: 100Ah

Product size: 135*197*35mm

Product weight: 1.82kg

Product voltage: 3.2V

internal resistance: within 0.5

Outdoor Photovoltaic Energy Cabinet, Base Station Energy Storage

The outdoor energy cabinet supports hybrid configurations with solar + battery + grid or diesel generator. The EMS intelligently switches among power sources for optimal cost-efficiency and continuity.
