

PIENAAR ENERGY (PTY) LTD

Increased renewable energy penetration morocco

Overview

Morocco is continuing its transition to renewable energy with impressive progress. In 2024, the country already reaches 45% of its electricity mix, and according to the 2025 Finance Bill (PLF), the target of 52% set for 2030 will be exceeded as early as 2027, with an expected. Power generated from renewables is up 44 percent in the North African country A surge in investment has boosted Morocco's power generation by nearly 5 percent over the past four years as the North African nation pushed ahead with an electricity expansion strategy to higher demand, according to its. Imagine a country that turns sunlight into gold and wind into electricity—a nation where renewable energy isn't just a political promise but a thriving reality. But this isn't just about solar panels baking under the sun or. Total primary energy consumption has increased by about five percent per year since 2004, but Morocco plans to decrease energy consumption by 15 percent from 2016 levels by 2030 through energy efficiency measures. This represents a 67% increase over the decade. Renewable energy is an attractive proposition as Morocco has almost complete dependence on imported energy carriers. In 2022, Morocco spent around US\$13.
