

## **PIENAAR ENERGY (PTY) LTD**

# **Is it good to install photovoltaic panels at a north-facing angle**

## Overview

---

Yes, you can install solar panels on a north-facing roof, but efficiency will be lower compared to south-facing panels. Tilt angle describes the vertical angle of your panels relative to the ground, measured in degrees from horizontal. They don't require perfect southern exposure to generate electricity. The efficiency loss depends on your specific location and roof pitch. In Texas, north-facing roofs typically produce 15-30% less energy than ideal south-facing. While south-facing roofs are often ideal for solar panel installation in the U.

## Is it good to install photovoltaic panels at a north-facing angle

---

### Can solar panels be installed on a north facing roof?

When it comes to installing solar panels on a north-facing roof, several limitations need to be considered. Firstly, a north-facing roof receives significantly less direct sunlight compared to a south-facing one. ...
