

**PIENAAR ENERGY (PTY) LTD**

# **Is it good to install solar inverter on water**

## Overview

---

Solar inverters typically have IP65 or higher ratings, meaning they can withstand water jets from any direction. That makes it ideal for typical. Determining whether your solar inverter should be installed indoors or outdoors is an essential consideration. While outdoor installation may be more convenient in terms of space, it exposes the inverter to a greater risk of water damage. But to make solar power usable for these water pumps, you'll need a specialized inverter. With a maximum power output of 1200 watts, this inverter is capable of handling larger solar panel arrays, making it a good option for those with higher energy needs.
