

PIENAAR ENERGY (PTY) LTD

Is it safe under the wind turbine of the solar-powered communication cabinet

Overview

Tech experts warn the use of rogue devices gives China the capability to operate the equipment remotely and potentially sabotage the United States and other countries power grids. Energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication devices inside certain solar inverters. Power inverters can be found in solar panels and wind turbines that are connected to the electricity grid as well as batteries, heat pumps, and electric vehicle chargers. The piece provides real-world attack scenarios from a business owner's perspective, analyzes the broader.
