

PIENAAR ENERGY (PTY) LTD

Italy grid modernization

Overview

€23 billion invested over 10 years to modernize Italy's grid, a 10% increase from previous plans. Grid upgrades to triple energy exchange capacity, significantly enhancing renewable energy integration. Anticipated annual CO₂ emissions reduction of 2,000 kt by 2030, reaching. Terna, Italy's leading transmission system operator, has unveiled its comprehensive 2025-2034 Development Plan. The initiative is designed to accelerate Italy's energy transition, enhance grid. Rome, 15 March 2023 - Enable the achievement of the European targets set by the "Fit-for-55" package, promote the integration of renewable sources, develop international interconnections, increase the security and resilience of the electricity system, and invest in grid digitalisation. - Government targets 46 GW solar capacity by 2030 with EU-backed incentives, attracting €9. Fabrizio Sorge analyzes the challenges and opportunities in the sector. Terna. Historical and Current Trends: The Italy Grid Modernization Market has experienced steady growth over the past decade, driven by Italy's commitment to integrating renewable energy sources and enhancing grid resilience. Between 2015 and 2020, the market CAGR hovered around 4.
