

**PIENAAR ENERGY (PTY) LTD**

# **Kabul energy efficiency**

## Overview

---

Kabul's energy efficiency regulations include various requirements and guidelines for both residential and commercial buildings. This study assesses the influence of building orientation and window-to-wall ratio (WWR) on energy performance of buildings in Kabul, Afghanistan. Employing BEopt™ energy simulation software, the study investigated these parameters to identify their optimal configuration for maximizing energy. Utilizing BEopt™ energy simulation software, the research evaluates the impact of these parameters on heating and cooling energy demands across varying configurations.

## Kabul energy efficiency

---

### **Kabul University Renewable Energy Laboratory (KUREL)**

KUREL is Afghanistan's first and most equipped renewable energy and energy efficiency laboratory based in the Energy Engineering Department at Kabul University Faculty of Engineering.
