

PIENAAR ENERGY (PTY) LTD

Kyrgyzstan-made solar grid-connected inverter

12.8V6Ah

Nominal voltage (V):12.8
Nominal capacity (ah):6
Rated energy (WH):76.8
Maximum charging voltage (V):14.6
Maximum charging current (a):6
Floating charge voltage (V):13.6~13.8
Maximum continuous discharge current (a):10
Maximum peak discharge current @10 seconds (a):20
Maximum load power (W):100
Discharge cut-off voltage (V):10.8
Charging temperature (°C):0~+50
Discharge temperature (°C): -20~+60
Working humidity: <95% R.H (non condensing)
Number of cycles (25 °C, 0.5c, 100%dod): >2000
Cell combination mode: 32700-4s1p
Terminal specification: T2 (6.3mm)
Protection grade: IP65
Overall dimension (mm):90*70*107mm
Reference weight (kg):0.7
Certification: un38.3/msds

Overview

Featuring MPPT technology, it optimizes solar energy conversion with up to 95% efficiency, supports AC output voltages between 180-260V, and enables easy system expansion without complex capacity considerations. Ideal for professionals seeking reliable, scalable, and efficient. The photovoltaic inverter market in Kyrgyzstan is experiencing steady growth driven by the increasing adoption of solar energy in the country. The market is primarily dominated by grid-tied inverters due to the country's focus on utility-scale solar projects. This guide ranks the most reliable manufacturers, analyzes key selection criteria, and reveals how businesses can optimize their renewable energy investments. Whether you Solar energy. A grid-tied solar system with a battery backup is an established grid-tie configuration equipped with a battery-based inverter, a battery bank, and a critical loads panel to ensure power supply We are a Solar Inverter supplier serving the Kyrgyzstan, mainly engaged in the sale, quotation, and. Can a solar inverter be used in locations with high fire risk?

Can a solar inverter handle different DC voltages from multiple solar panels?

Can a solar inverter be used in a solar-powered street lighting system?

How does a solar inverter handle electrical surges or lightning strikes?

We are a. Grid-connected inverter control techniques Although the main function of the grid-connected inverter (GCI) in a PV system is to ensure an efficient DC-AC energy conversion, it must also allow other functions useful to limit the effects of the unpredictable and stochastic nature of the PV source., used in where the inverter draws its DC energy from batteries charged by photovoltaic arra. have a complex relationship.

Kyrgyzstan-made solar grid-connected inverter

Kyrgyzstan Solar PV Inverter Market (2025-2031) , Size & Revenue

6Wresearch actively monitors the Kyrgyzstan Solar PV Inverter Market and publishes its comprehensive annual report, highlighting emerging trends, growth drivers, revenue analysis, and forecast outlook. ...
