

**PIENAAR ENERGY (PTY) LTD**

# **Lake Solar Photovoltaic Power Generation Project**

## Overview

---

As part of its plan to further tap into the economic potential of the lake, LLDA seeks to utilize the lake surface area for renewable energy generation by facilitating floating solar photovoltaic (FPV) generation plants at commercial scale. We specialize in converting under-utilized water bodies into. Evaporation rates in the United States are especially high, due in part to the fact that the two largest U. Spreading across a former subsidence area from coal mining, this site transforms abandoned land into a vast renewable energy asset. These farms have been successfully deployed across various U.

## Lake Solar Photovoltaic Power Generation Project

### 10 Revolutionary Floating Solar Farms on Lakes

Imagine a lake near you, not just a serene expanse of water, but also as a powerhouse generating clean energy. That's the reality we're sailing toward with floating solar farms.

## Decarbonization potential of floating solar photovoltaics on lakes

In this study, we quantify the energy generation potential of FPVs on over 1 million water bodies (>0.1 km<sup>2</sup> in surface area) worldwide, including both natural and artificial lakes and
