

PIENAAR ENERGY (PTY) LTD

Large-scale energy storage in jamaica bans lithium

LIQUID/AIR COOLING

ON GRID/HYBRID

PROTECTION IP54/IP55

BATTERY /6000 CYCLES

Overview

In early 2024, Jamaica's Ministry of Science, Energy, and Technology announced a phased ban on lithium-ion batteries for projects over 1 MW. The decision follows: "Our focus is on sustainable, climate-resilient solutions," said Minister Daryl Vaz. The suspension of the Common External Tariff (CET) on lithium-ion batteries has been extended for another two years until February 2027, Government has announced, in effect making the setting up of renewable systems in Jamaica more affordable. This bold move aims to address safety and environmental concerns while reshaping the island's renewable energy strategy. Let's explore why Jamaica took this step and what. The Jamaican government is actively implementing strategies to mitigate the entry of substandard lithium-ion batteries, as international regulations tighten. The Ministry of Science, Energy, Telecommunications and Transport is developing the policy, which will address, among other things, the proper storage of lithium-ion batteries, for which more. Details: The National Energy Administration said in a draft policy document (in Chinese) that it would ban "in principle" any new "large-size" energy storage projects that use repurposed lithium-ion batteries.
