

**PIENAAR ENERGY (PTY) LTD**

# **Lifespan of solar street light panels**

## Overview

---

Solar street light systems typically last 15–25 years, depending on climate, component quality, and maintenance practices. While the lifespan varies by component and environmental factors, modern solar street lights are designed to provide reliable performance for years, often exceeding the longevity of traditional grid-powered lighting. Batteries are typically the first to need replacement — usually every 5 to 8 years. When shopping for these systems, it makes sense to invest in better.
