Long-lasting solar-powered container for agricultural irrigation in Njirumud

Overview

This study explores the design and adaptation of a shipping container into a portable irrigation control station for agricultural operations. This model uses sunlight to generate electricity while growing crops or raising livestock. It creates dual revenue: farmers sell both clean power and agricultural products.

Long-lasting solar-powered container for agricultural irrigation in N

Solar-powered irrigation: A pathway to low-carbon farming in sub

Using these estimates, the financial performance of appropriately sized solar- and diesel-powered irrigation systems was evaluated and compared to identify the geographic areas suitable for ...
