

PIENAAR ENERGY (PTY) LTD

Mauritius data center energy storage

**Modular design,
unlimited combinations in parallel**

BUILT-IN DUAL FIRE PROTECTION MODULE

Overview

The Government of Mauritius has inaugurated a 20 MW grid-scale battery energy storage system (BESS) at the Amaury Sub-station, marking a significant stride towards its ambitious goal of achieving 60% renewable energy in the electricity mix by 2030. Summary: Mauritius is accelerating its renewable energy transition through strategic photovoltaic (PV) and energy storage projects. This article explores bidding opportunities, technical requirements, and market trends for solar-plus-storage projects in Mauritius, with actionable insights for. Integrated with 400 MWh fast-response BESS for grid stability and near-continuous renewable supply. Specifically engineered to serve critical telecom and data center loads. Smart controls for. The Mauritius data center market size is 5 MW in 2025 and is on course to reach 11 MW by 2030, delivering a 17.08% CAGR that outpaces most African peers. This sharp expansion reflects the island's pivot from sugar exports toward a diversified, digital-first economy supported by predictable. The government of Mauritius has welcomed the commissioning of a 20MW battery storage project which will provide frequency regulation to the East African island nation's grid. Grid-Scale Battery Energy Storage System (2MW) at.
