Mexican Energy Storage Power Station Operation Plan

Overview

Mexico's new binding power plan mandates a massive state-led clean energy buildout, using 5 GW of battery storage to stabilize the grid. The objective is to. The Indicative Program for the Installation and Retirement of Power Plants (PIIRCE), contained in the National Electric System Development Program (PRODESEN) 2022-2036, projects that by that period some 4,505 MW of energy storage systems could be installed in the country. The Official Gazette of the Federation of Mexico has published Agreement. Mexico's energy sector has unveiled a groundbreaking policy, stirring up the global energy storage market and introducing new variables to its development path. Recently, the Mexican Ministry of Energy announced a new regulation mandating that all newly built wind and solar PV projects must be. On , Mexico's Energy Regulation Commission (CRE) published on the National Commission for Regulatory Improvement (CONAMER) website the preliminary draft of the agreement issuing the General Administrative Provisions for the Integration of Electric Energy Storage Systems into the National.
