

**PIENAAR ENERGY (PTY) LTD**

# **Microgrid Resilient Operation**

## Overview

---

NLR is collaborating with Los Alamos National Laboratory and Sandia National Laboratories and partners San Diego Gas & Electric and the National Rural Electric Cooperative Association to create a capability called resilient operation of networked microgrids, which can help. NLR is collaborating with Los Alamos National Laboratory and Sandia National Laboratories and partners San Diego Gas & Electric and the National Rural Electric Cooperative Association to create a capability called resilient operation of networked microgrids, which can help. NLR develops and evaluates microgrid controls at multiple time scales. Our researchers evaluate in-house-developed controls and partner-developed microgrid components using software modeling and hardware-in-the-loop evaluation platforms. A microgrid is a group of interconnected loads and. A microgrid is more than just backup, when designed properly, it becomes a platform for resiliency, efficiency, and sustainability.

## Microgrid Resilient Operation

---

### Cost-effective and sustainable operation of microgrids using Improved

The global transition to sustainable energy demands efficient integration of renewable resources and resilient operation of microgrids (MGs). This study aims to develop a cost-effective and
