

## **PIENAAR ENERGY (PTY) LTD**

# **Mineral water bottles used to generate electricity from solar panels**

## Overview

---

The process turns recycling bins into power plants through three key steps: Jakarta's floating market now runs entirely on what locals call "Aqua Power" - a system combining 4,000 recycled bottles with floating solar panels. The setup generates 35kW daily while cleaning up waterway. With SOURCE® Hydropanels, solar-powered technology is utilized to extract drinking water from the air and in turn providing mineralized drinking water for users. Serious problems require serious innovation. Unlike traditional solar panels that generate electricity, SOURCE panels produce mineralized drinking water using. The quick summary: Solar-powered SOURCE Hydropanels extract drinking water directly from the air, offering a sustainable alternative to plastic bottles while providing mineralized, high-quality water for households. This ingenious idea sparked far-reaching waves of change when Illac Diaz brought it to life through his organization, Liter of Light, reported Climate Heroes.
