

**PIENAAR ENERGY (PTY) LTD**

# **Moldova lithium energy storage power supply**

## Overview

---

The storage system operates a NMC-type lithium-ion battery with a capacity of 6 MWh, produced in Romania and a total output power of 7 MW using 2 central battery inverters from SMA to inject directly into the medium voltage grid of the local grid operator ENEL Distributie. The storage system operates a NMC-type lithium-ion battery with a capacity of 6 MWh, produced in Romania and a total output power of 7 MW using 2 central battery inverters from SMA to inject directly into the medium voltage grid of the local grid operator ENEL Distributie. The Republic of Moldova has taken another significant step toward strengthening its energy security by initiating the procurement of a state-of-the-art Battery Energy Storage System (BESS). The tender process, launched by USAID through the Moldova Energy Security Activity (MESA) in partnership with. The project uses advanced energy storage technology to build an efficient and reliable storage system, integrated with local renewable energy generation and the traditional grid. It optimizes the power supply structure, meets Moldova's growing electricity demand, and promotes the sustainable. Moldova will purchase a state-of-the-art Battery Energy Storage System (BESS) with a capacity of 75 MW and internal combustion engines (ICE) with a capacity of 22 MW to strengthen the country's energy security. With solar and wind capacity growing at 12% annually, the country aims to reduce reliance on imported electricity by 35% before 2030. With only 8% of electricity currently generated from renewable sources (National Bureau of Statistics, 2023), the country requires energy st Moldova's energy. The US will invest EUR78. Secretary of State Antony Blinken announced up to EUR78.

## Moldova lithium energy storage power supply
