

PIENAAR ENERGY (PTY) LTD

Mozambique joins the home solar power generation

Overview

AMEA Power and Hidropower join forces to develop a 125 MWp solar project in Mozambique, bringing clean energy to over 150,000 homes and reducing CO2 emissions by 232,900 tonnes annually. Mocuba is Mozambique's first large-scale solar power plant—and a testament to the country's growing commitment to renewable energy. Once the gas flows in earnest, it could transform the country into a leading producer and exporter. The new agreement supports Ignite's goals of deploying more than 300k solar home systems in the coming years To reach large-scale impact, we must combine capital support with smart, digital, and last-mile operations. We are excited to share this vision with the BRILHO Program” MAPUTO, MOZAMBIQUE. Mozambique is set to significantly expand its solar power infrastructure with two new plants in Cabo Delgado and Nampula. The country's strategic shift toward renewable energy is reshaping its economic landscape while addressing critical power needs across the region. This. 3 solar power projects totalling 260MW in generation capacity with state-of-the-art Battery Energy Storage Systems (BESS), including the first 100MW floating solar PV project to be developed in Mozambique.
