# Mozambique s new solar panels

---

## INTEGRATED DESIGN

EASY TO TRANSPORT AND INSTALL,  
FLEXIBLE DEPLOYMENT

## Overview

---

Mozambique is advancing its renewable energy initiatives with the launch of a significant new solar project. Developed by EleQtra, the project will install a total of 14 MW of solar power capacity combined with a 40 MWh battery storage system spread across three strategic sites. These initiatives underscore the country's firm commitment to renewable energy and sustainable development, marking a pivotal step in its ambitious national energy strategy. The Central Solar de Mocuba (CESOM) is Mozambique's first large-scale solar power plant, addressing the country's electricity reliability issues. Located in Zambézia province, this 40 MW facility is a crucial step towards sustainable energy in a nation rich in hydro, gas, and solar potential but. Key Figures & Findings: Mozambique has finalized feasibility and environmental studies for a 400 MW solar project to be developed under the Cahora Bassa Hydroelectric (HCB) framework, one of the largest independent power producers in Southern Africa, which exports electricity to South Africa and. A community of farmers found new hope in the construction of the Mocuba solar plant that is providing consistent, clean, and affordable energy to homes and small businesses in Zambezia region, Mozambique. By Erin Baldwin and Luiana João.
