

NDRC Photovoltaic Panel Policy

Overview

The reform focuses on three key aspects: allowing market forces to determine renewable power pricing, establishing a pricing and settlement mechanism that supports the long-term sustainability, and adopting differentiated policies for existing and new projects. On February, China's National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) jointly issued the Notice on Deepening the Market-Oriented Reform of New Energy On-Grid Electricity Prices to Promote High-Quality Development of New Energy (hereafter. The NDRC plans to shift to a market-based bidding system for electricity payments after June 2025. China now has 887GW of installed solar power, more than six times the capacity of the US. Credit: vvaldmann/Shutterstock. The policy marks a turning. China's economic planning agency is taking steps to scale back subsidies for solar projects, following a boom in installations., according to the. BEIJING, Feb.
