

PIENAAR ENERGY (PTY) LTD

Nassau demand response

Overview

Long Island experiences high electricity demand during hot summer days, straining the grid and requiring expensive backup power. Demand response reduces peak load by incentivizing customers to use less energy during critical hours. Why Join PSEG Long Island's Demand Response Program?

Get paid monthly for reducing. Demand side response (also known as demand response or DSR) is an effective way of creating new revenues for a variety of different types of business. What is demand response?

Demand side. The 2023 Integrated Resource Plan (IRP) studies supply- and demand-side resources for electric power supply to Long Island and the Rockaways. The IRP will help LIPA chart a path forward for compliance with New York State's nation-leading climate policy, and ensure access to adequate electric power. NEW YORK, Feb. 3, 2026 /PRNewswire-PRWeb/ -- WellStat, a leading PropTech company delivering real-time energy and building intelligence, today announced a major expansion of its Demand Response (DR) operations across New York State, New England, and California. For more than two decades, WellStat. The electric distribution utilities and the wholesale system operator, the New York Independent System Operator (NYISO), offer programs to customers to reduce electricity usage when demand on the network is highest. Below are some of the important parameters for each program.
