

PIENAAR ENERGY (PTY) LTD

New Energy Wind and Solar Power Generation

Overview

As a result of new solar projects coming on line this year, we forecast that U.S. solar power generation will grow 75% from 163 billion kilowatthours (kWh) in 2023 to 286 billion kWh in 2025. Growth in utility-scale and distributed solar PV more than doubles, representing nearly 80% of worldwide renewable electricity capacity. In our latest Short-Term Energy Outlook, we forecast that wind and solar energy will lead growth in U.S. Overall, global energy demand grew by 2.2% in 2024, outpacing the average annual growth rate of 1.2%.

[Photo/WeChat account: shswwhywxh] Shanghai has approved the Fengxian 1# offshore photovoltaic project, the first commercial-scale solar-wind hybrid of its kind in.
