

PIENAAR ENERGY (PTY) LTD

New lithium battery energy storage plant

Overview

The Zhejiang Longquan lithium-iron-phosphate energy storage demonstration project is touted as the world's first large-scale semi-solid-state battery energy storage system. It was officially connected to the grid and began operations in June. Duke Energy has brought on line a 50-megawatt, four-hour battery energy storage system at its former Allen coal plant on Lake Wylie, serving customers in North Carolina and South Carolina, and has unveiled plans for additional battery storage and new jobs at the Gaston County site. The first BESS. Jiangxi province-based Shenghua will set up a joint venture project with local lithium-battery materials supplier Dalong Huicheng New Material to invest in, build, and run the plant, with Shenghua holding a 90 percent stake in the new company. Ferrous oxalate is a key feedstock used in the. In Zhejiang, China, a new energy storage power plant that opened in June is a step toward a secure power grid, according to a release published by CleanTechnica.
