

**PIENAAR ENERGY (PTY) LTD**

# **North Asia Off-Grid Solar Container Bidirectional Charging**

## Overview

---

In this project, we present a solar-based bi-directional EV charger that utilizes a combination of solar energy and lead-acid batteries to power the vehicle, along with a V2H system that allows the EV battery to discharge back into the grid. Base station using off-grid container for bidirectional ch to Voltaic (PV) based OFF-grid charging station for electric vehicles. Four modes of operation, high gain, and three input/output ports are the main advantages of the proposed converter. The converter supports Grid-to-Vehicle (G2V), PV-to-Vehicle. The off-grid solar system market, specifically focusing on containerized energy storage solutions, is experiencing robust growth, driven by increasing demand for reliable and sustainable a?

| Container energy storage off grid solar system integrates solar power and battery storage into a renewable. Bidirectional charging allows an electric vehicle not only to draw energy from the utility grid but also to feed surplus power back into it—and even supply electricity to your home.
