

**PIENAAR ENERGY (PTY) LTD**

# **Off-grid solar container DC power supply for chemical plants**

## Overview

---

A complete solar-battery-generator power plant pre-built into a shipping container. We integrate the inverter/chargers, lithium batteries, DC charge controllers, switchgear, ventilation/air-conditioning, fire safety, and remote monitoring. In response, MEOX Off-Grid Container Power Systems has emerged as a modular, rapidly deployable solution (4-hour setup) that integrates solar, storage, and diesel backup for reliable energy independence. Our hybrid systems leverage core technologies like DC-coupled architecture (system efficiency). MOBIPOWER containers are purpose-built for projects where energy demands go beyond what a trailer can deliver. Each container is equipped with a photovoltaic array, a battery bank, and a generator — all custom-sized to meet the specific needs of the customer. Solar energy containers encapsulate cutting-edge technology designed to capture and convert sunlight into usable electricity, particularly in remote or off-grid locations.
