

**PIENAAR ENERGY (PTY) LTD**

# **Off-grid solar container fast charging installation solution**

## Overview

---

It's more expensive since you're paying for a pre-designed and engineered solution, but damn if it doesn't make it easy! To save a bit of money instead, you can source your own solar panels, solar charge converter, batteries, inverter, and wiring, then make it all play together. This is the product of combining collapsible solar panels with a reinforced shipping container to provide a mobile solar power system for off-grid or remote locations. Unlike standard solar panel containers, LZY's mobile unit features a retractable solar panel unit for quick installation. For me and my. MOBIPOWER containers are purpose-built for projects where energy demands go beyond what a trailer can deliver. These rugged, self-contained systems integrate large solar arrays, advanced battery storage, and high-capacity fuel cells — with optional diesel redundancy when regulatory or client. The patented EV ARC™ is the only 100% renewable, transportable, off-grid EV charging option on the market. It is a versatile energy infrastructure product with a sleek aesthetic design that fits in the size of a standard parking space. Born from years of solar expertise at Danger Electric.

## Off-grid solar container fast charging installation solution

---

### ENPACK , Microgrid Solution with Off Grid EV Charging

ENPACK is a supercapacitor battery-based containerized microgrid solution that can also be used as an Off-Grid EV charger.
