

**PIENAAR ENERGY (PTY) LTD**

# **Off-grid type of energy storage battery cabinet for virtual power plants**

## Overview

---

Instead of relying on one massive power station, they network thousands of decentralized sources—solar panels, wind turbines, and energy storage batteries—into a single, smart system. Imagine your neighbor's Tesla Powerwall pitching in during a heatwave. Paired with advanced battery storage, VPPs enhance reliability, unlock new revenue streams, and support deeper renewable integration. This shift delivers. The 4th-gen model offers customized overall energy solutions, supporting critical scenarios like peak shaving, virtual power plants, backup power, and three-phase unbalance management. Safety is our top priority, so we've engineered this energy storage cabinet to deliver consistent, sustainable. AZE's all-in-one IP55 outdoor battery cabinet system with DC48V/1500W air conditioner is a compact and flexible ESS based on the characteristics of small C&I loads. Leveraging AI-driven optimization, VPP integration, and intelligent energy management platforms, we deliver safe, efficient, and scalable energy storage. Virtual power plants (VPPs) are like the Swiss Army knives of energy grids.
