Ottawa energy storage for renewable energy

IP65/IP55 OUTDOOR CABINET

OUTDOOR CABINET WITH AIR CONDITIONER

OUTDOOR ENERGY STORAGE CABINET

19 INCH

Overview

The battery storage project alongside the six solar projects Council supported earlier this fall will reduce the city's reliance on expensive gas-fired electricity during peak demand and strengthen Ottawa's ability to meet its climate and energy commitments. In 2025, the City of Ottawa established official plan and zoning provisions for battery energy storage uses in accordance with new Official Plan policy. BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, which can then discharge. The Ottawa BESS 2 Project, among other electricity storage sites, will help address emerging global and regional electricity needs for the coming decades.
