

**PIENAAR ENERGY (PTY) LTD**

# **Outdoor On-site Energy Solar Power Belt**

## Overview

---

These off-grid systems are perfect for areas where access to traditional grid power is unavailable or cost-prohibitive, ensuring continuous power supply regardless of location. With no roof or structure to fix a solar array, how can you complete outdoor projects without power?

Job sites in remote or unoccupied areas require reliable power to see any real progress, but without the infrastructure to support lights, power tools, and more, how are you supposed to get any work. Installing on-site renewable energy systems is a common strategy facility owners can use to save money, reduce their greenhouse gas emissions, and add resiliency to their facilities by generating their own electricity. Many facilities have recognized the advantages of on-site renewable energy. Solar power systems built by Arkpax are designed for real-world performance, using advanced battery technology and efficient charging to keep your gear powered off-grid. Whether you are dealing with a blackout or setting up in an undeveloped space, there is a solar generator that meets your needs. Solar Electric Supply's MAPPS<sup>®</sup> are stand-alone solar power systems, engineered to support a wide variety of remote power requirements.

## Outdoor On-site Energy Solar Power Belt

---

### Renewable Energy Belts

These belts, often of synchronous or V-belt varieties, efficiently transfer rotational energy captured from the wind, sun, or moving water. This allows for smooth operation and the conversion of renewable ...
