

## PIENAAR ENERGY (PTY) LTD

# Outdoor power usage costs

## Overview

---

Use our electricity cost calculator and find out how much it costs to run outdoor lights (and other electrical appliances) for a day or a month. This guide breaks down energy consumption, pricing models, and real-world scenarios for solar generators, portable batteries, and hybrid solutions. Discover how factors like battery capacity and solar charging impact your daily expenses. You can keep them on for several hours without seeing a major increase in your electricity bill. LEDs are designed to be energy-efficient. Outdoor LED lighting isn't just about saving electricity—it significantly reduces overall costs in multiple ways:

- Lower Energy Bills - LED lights consume 50-80% less electricity.
- Fewer Replacements - With a 50,000-hour lifespan, you replace LEDs far less often than traditional bulbs.

To calculate the cost per day and per month for your garden lights, simply input the. Electricity usage is measured in kilowatt-hours (kWh). In 2025, the national average cost per kWh was 16. If you're running your landscape lighting from dusk until midnight in the state of Connecticut, that's about 5 hours per day. In contrast, incandescent bulbs last only about 1,000 to 2,000 hours on average.
