

PIENAAR ENERGY (PTY) LTD

Overseas Energy Storage System Prices

Overview

The global energy storage market is undergoing a cost revolution, with foreign projects like those in the U. In 2024 alone, average system prices plunged 40% globally to \$165/kWh, with China hitting jaw-dropping \$85/kWh for 4-hour systems [10]. In 2025, the global average price of a turnkey battery energy storage system (BESS) is US\$117/kWh, according to the Energy Storage Systems Cost Survey 2025. Ember provides the latest capex and Levelised Cost of Storage (LCOS) for large, long-duration utility-scale Battery Energy Storage Systems (BESS) across global markets outside China and the US, based on recent auction results and expert interviews. BNEF says the decline is driven by continued. You've probably noticed something frustrating - a 10MW battery storage system might cost \$8 million in Texas but soar to \$24 million in Japan. What's driving these wild price swings, and how can you secure competitive quotes without compromising quality?

Let's unpack the 2025 market realities. It represents lithium-ion batteries (LIBs)—primarily those with nickel manganese cobalt (NMC) and lithium iron phosphate (LFP) chemistries—only at this time, with LFP becoming the primary.
