People use solar energy to generate electricityEnglish

Overview

Solar technologies convert sunlight into electrical energy either through photovoltaic (PV) panels or through mirrors that concentrate solar radiation. Professor of Engineering, Pennsylvania State University. Encyclopaedia Britannica's editors oversee subject areas in which they have. Solar energy is created by nuclear fusion that takes place in the sun. It is necessary for life on Earth, and can be harvested for human uses such as electricity. Using solar systems like solar electricity and batteries can reduce carbon footprints and lower energy costs. These two methods are revolutionizing how we harness.
