

PIENAAR ENERGY (PTY) LTD

Photovoltaic Panel Transportation Price List

Overview

Short version: From 2024, it costs between \$2,800 and \$5,500 to ship a 20-foot container of solar panels around the world, depending on origin, destination, fuel prices, and demand. The 40-foot container, which is the one used for larger installations, ranges from \$4,500. How much does it cost to transport solar panels?

To transport solar panels, the cost typically ranges from \$500 to \$5,000, based on various factors like distance, panel quantity, and transport method. Transportation fees vary according to distance, meaning longer distances generally incur higher. Whether you're a solar startup importing your first bulk order from Shenzhen or a do-it-yourselfer outfitting a container home in the Arizona desert, the cost of shipping solar panels in a container is more than just a line item — it can make or break your project budget. Unlike regular deliveries, solar panel transportation needs extra care. These panels are fragile, heavy, and expensive. This article breaks down pricing variables, shares actionable strategies to reduce expenses, and provides updated 2024 industry data to help you make informed decisions.
